LinknLink

About LinknLink

With deep experience in smart home and IoT industry, LinknLink is specialized and leading in innovative smart solutions for homes, commercial buildings and industrial applications, benefiting people with real comfort, easy and fun living as well as great savings on energy consumption and labor cost.

Why Us

- EXPERIENCE-** We bring 10+ years of expertise in the smart home and energy efficiency industries, with core members having 20+ years of experience in IoT.
- AI-POWERED-** We integrate AI technologies (ChatGPT/DeepSeek) into our devices and services, offering the easiest user experience with no prior expertise required.
- INNOVATION-** We create industry-leading features and deliver unique competitive advantages that set our products apart from others in the market.
- FLEXIBILITY-** We offer flexible partnership options, including OEM, ODM, software development, and licensing, starting from small volumes.
- COMPATIBILITY-** We embrace open platforms, ensuring our products are compatible with Home Assistant, Alexa, Google, Matter, HomeKit, SmartThings, HomeSeer, etc.

AI Home Gateways

- Native support of 9 protocols (LinknLink, Tuya, BroadLink, zigbee, Matter, MQTT, RTSP, ONVIF, Modbus)
- Supports 2000+ smart home brands added natively or synced from HA
- Works with Alexa, Google Home, Siri and HomeKit for all devices
- Entirely local control and automations - No Internet connection required
- Remote control via LinknLink, Alexa or Google Home App - No additional cost
- Digital photo frame for playing pictures/videos from SD card, USB drive or cloud storage
- Flexible expandability for Android/Linux apps through add-on store
- AI home energy management to reduce your electricity bills
- AI space feature for ultimate comfort with unattended automations

60GHz mmWave Radar Presence | IR Blaster | Brightness | Temperature | Humidity | BLE Hub | Motion2MQTT | Matter | HomeKit | SmartThings | HomeSeer

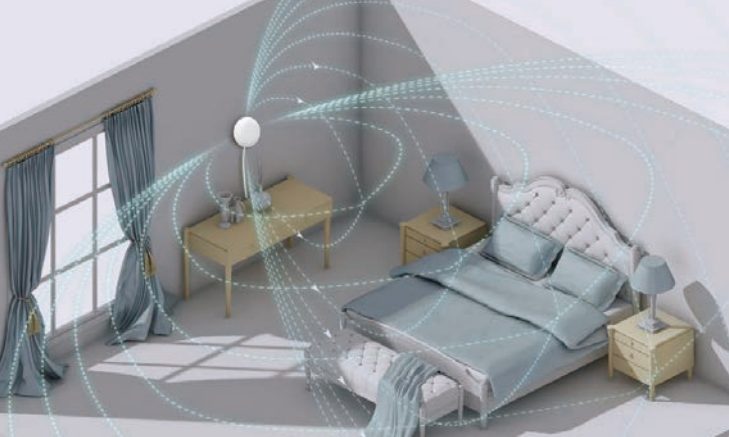

UP TO 40m²

- 4-zone geo-fencing detection with anti-interference
- Real-time positioning with max 4-person headcount
- Downloadable 3-year history records with in/out & zone tracking
- Built-in long-range IR blaster with auto-matching and manual learning
- Integrated brightness sensor
- Integrated temperature and humidity sensor
- Works with Alexa, Google Home, Matter, HomeKit & SmartThings
- Supports MQTT for Home Assistant
- BLE hub for extended connectivity with max 20 BLE sensors
- Optional with fall-detection feature for enhanced elderly care

Connectivity	WiFi 2.4GHz 802.11 b/g/n Bluetooth
Power Input	USB-C 5V/2A
Radar Tech	60GHz mmWave
Fenced Detection	By zones
Fall Detection	Optional
Live Tracking	Yes
Headcount	Yes (max 4)
IR Frequency	38kHz
IR Range	15m line-of-sight (max)
IR Angle	360° (V) / 150° (H)
Temperature	-20~60°C ±0.3°C
Humidity	0~99% RH ±2%
Brightness	3-levels
BLE Hub	Yes (max 20 devices)
Matter Compatible	Yes

Smart IR Universal Remote

eRemote HA

IR Brands List | Auto Matching | Manual Learning | Cloud Program List | IR2MQTT

- IR control for TV, AC, STB, audio, and other devices
- Cloud IR database with 22 device types, 2,000+ brands, and 500,000+ models
- Supports manual IR learning for custom devices
- Preset TV operators and channel lists for easy access
- Timed schedules and automation
- Works with Alexa and Google Home for voice control
- Supports MQTT for easy syncing with Home Assistant

Smart RF Universal Remote

eHome

315/433MHz | Manual Learning | RF2MQTT

- RF control for ceiling fan, switch, curtain/shades motor and others
- Wide RF frequency for best compatibility
- Timed schedules and automation
- Works with Alexa and Google Home for voice control
- Supports MQTT for easy syncing with Home Assistant

Automate Device Management for Your Vacation Rental

Smart BNB Solution

Smart check-in, personalized welcomes, energy savings, and 24/7 security - LinknLink SMART BNB Solution simplifies hosting and delivers a seamless, unforgettable stay for your guests!

Automate Device Management for Your Vacation Rental

You're just minutes away from automating your Airbnb device management. Experience enhanced efficiency, boosted security, and significant energy and cost savings - all with minimal effort.

Seamless Check-In, Zero Hassle

Auto Scheduling

Sync your Airbnb calendar with smart locks to generate unique access codes for each booking.

-  Automatically send codes to guests before arrival.
-  Remote check-in/out with real-time status updates.

Impress Guests from the First Step

Auto Welcome

Create unforgettable first impressions with personalized automation:

-  Auto-send welcome messages and Wi-Fi codes via SMS/email.
-  Trigger ambient lighting, music, or HVAC upon guest entry.
-  Pre-set amenities (e.g., aromatherapy) for instant comfort.

Cut Costs Without Lifting a Finger

Auto Savings **30%**

Smart sensors detect occupancy to eliminate energy waste:

-  Auto-shut off lights, AC, and TVs when rooms are empty.
-  Optimize energy use during low-demand periods.
-  Save up to 30% on utility bills per property.

Protect Your Property 24/7

Auto Security

Ensure safety and compliance with intelligent monitoring:

-  Track guest count to prevent unauthorized visitors.
-  Rain Alert System: Door/window sensors trigger instant alerts if left open during rain

We are looking to partner with you if you are

- Electronics retailer, distributor, or reseller
- OEM/ODM brand owner
- System integrator or installer
- Automation project owner or contractor
- Utility provider, ISP, or operator
